The 585 Series Enclosure from Atrenne Computing Solutions is a portable 8-slot CompactPCI lightweight aluminum enclosure ideally suited for high availability, demanding requirements in datacom, telecom, industrial automation and mobile test environments.

Highly serviceable and maintainable, the 9U rackmount/benchtop enclosure features a flush card cage that accommodates either five or eight 6U x 160mm CompactPCI boards housed in a vertical orientation. The right-most slot is double-wide and reserved as the system (CPU) slot. The backplanes support H.110, the IPMB as specified in PICMG 2.9 rev. 1.0, 5.0, or 3.3-volt keying and hot swap. Optional 1101.11-compliant 80mm transition I/O cards are supported. One 5.25" x 1.63" device is available on a double-wide carrier card, and two 3.5" x 1.0" devices (one accessible) are available on a single-wide carrier card.

The 585 Series Enclosure includes a five-output, 320W auto-select 90-264 VAC ATX power supply. The cooling subsystem consists of two high-reliability 93 CFM, DC ball-bearing fans and a 35 CFM power supply exhaust fan, lower front air intake, and top exhaust.
