Errata 001 for PICMG COM.0 Revision 2
October 19, 2010

The specific change:
Add USB_SSTX[0:3] and USB_SSRX[0:3] to the list of signals in 4.5.1

Reason for change:
The SuperSpeed USB signals are not listed in Section 4.5.1 Signals Requiring Module Termination. The signal description table in Section 4.3.9 clearly states that the termination capacitors belong on the module. The change adds USB_SSTX[0:3] and USB_SSRX[0:3] to the list of signals requiring module termination.
